# Corporate Brochure

## Welcome to the

# **KENSON** GROUP

## Overview

At Kenson, we offer a variety of production and operational services to the oil and gas sector in Trinidad and Tobago. **The Kenson Group of Companies** comprises **Kenson Operational Services Ltd, Kenson Production Services Ltd, PF Engineering & Construction Company Ltd** and the **Kenson School of Production Technology**.

Since our operations commenced in 1995, we have grown to over 300 employees providing Operations and Maintenance services on off-shore platforms and at onshore facilities and drilling support services for our clients mainly comprising of the major multinational corporations and state corporations

Such services have led to the development of a deep and mutually beneficial business relationship with our clients.

Over the years we have been able to pursue joint strategies for a most cost-effective approach to platform management.

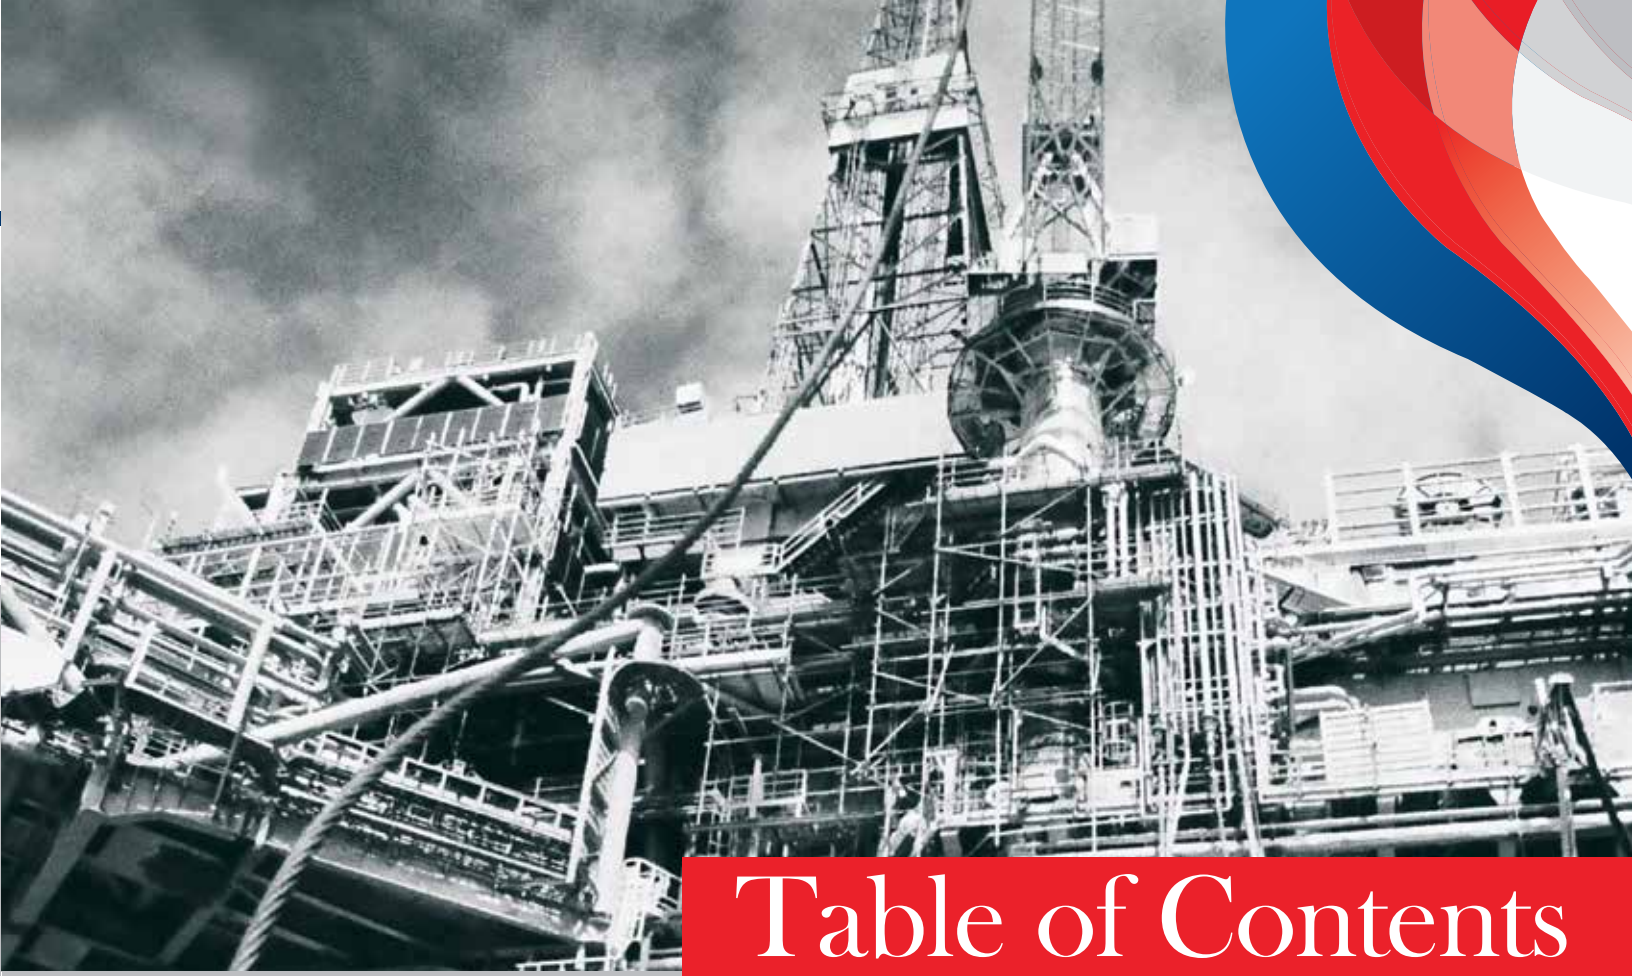

Our experienced administrative staff and 24-hour emergency response personnel support our operations.

The success of the **Kenson Group** to date, turns on our capability for in-depth operational analysis of platform and equipment conditions and our commitment to robust **HSSE Management practices and the deliverability of quality driven services. Kenson is STOW Certified.**

The **Kenson School of Production Technology** has been the premier local training institute for offshore platform experiences. It provides a virtual catchment of trained technicians in support of

**Kenson's** operations off-shore and onshore. It is this focus on such technical training which primarily distinguishes the **Kenson Group** from all other energy services providers.

Our management team comprises experts in the major areas of oil and gas exploration, drilling and production. This integrated leadership team fully experienced in managing diverse work teams, is capable also of designing strategies to respond to any unforeseen circumstances likely to arise thereby ensuring that organizational goals continue to be achieved. **Kenson's** executive team has had, for many years, and continues to have a close working relationship with the major multi-national corporations based in the local energy sector.

- **Monitoring and control of process variables**
- **Crane operation and maintenance**
- **Plant cleanup maintenance**
- **Logistics coordination**
- **Warehouse attending**
- **Operations coaching**
- **Competency Assessment**
- **On-going HSSE management - supply of safety advisors**

# Equipment, Reliability & Maintenance (ERM)

**Kenson's** Equipment Reliability and Maintenance team focuses on maintenance and testing strategies which optimize performance of the critical components affecting the overall integrity and reliability of process plants and control systems.

Our capabilities for ERM encompass the following:

## **OIL & GAS MEASUREMENT SERVICES**

- Proving for Custody Transfer
- Fiscal Meters - oil/gas
- Master Meter Proving
- Water Draw Calibration for prover loops
- Servicing and Calibration of Chart Recorders
- BS&W Monitor repairs

## **MAINTENANCE MANAGEMENT**

- Preventative maintenance
- Condition Monitoring
- Predictive maintenance

## **SPECIALIZED MAINTENANCE SERVICES**

- Mechanical
- Electrical and Instrumentation (E&I)
- Automation control system
- Planning and scheduling
- Root cause failure analysis
- Project Management Services
- System Upgrades

## **SCADA, PLC's & DCS VALVE MAINTENANCE**

- Pressure safety valves
- Process isolation valves
- Fire and gas detection systems

# Valve Services

Services such as valve repairs, welding and fabrication and instrumentation are carried out by our personnel at our machine shop which is located at Kenson's head office.

## VALVE RECONDITIONING / REPAIRS

Our mobile Valve Unit allows on the spot services for shut down or Turn-a-Round (TAR) on a 24 hour 7 days a week basis. The Unit contains two (2) certified test stands, work bench, lathe, sandblasting unit, tools and accessories. Kenson's Valve shop is completely equipped to conduct overhaul and repairs to ball and gate valves up to 30" in bore size.

## WELDING AND FABRICATION

Kenson's workshop includes equipment to support welding and fabrication for the following:

- Platforms structures I walkways/railings
- Carrying Baskets - to transport goods and materials offshore
- Stands and Mounts Electrical and Instrumentation equipment on offshore facilities As part of the process we also provide minor sandblasting works as required.

## INSTRUMENTATION

- Pressure Testing
